

BERGOLINE - GENERAL OIL Hypo Marine Sae 80W90

Oil for transmissions, for lubrication of outboard engine legs, stern drive units and sail drive.
It complies with API GL-5, MIL-L-2105D standards.

Code	Package
65.087.00	1

**Lower unit gear oil pump****2020 CONNECTORS**

To top up/fill the lower unit gear or sterndrive unit or Sail Drive with oil tapping it from a standard 1/5-I drum.

The kit includes:

- Pump to put into the drum fitted with adapter for the drum thread (USA and Europe).
- 3 fittings to fill any 2/4-stroke outboard engine and Volvo SX, Mercruiser, OMC, OMC Cobra sterndrive units,

Code	Description
65.116.20	Oil filling pump

**Additives for engines****FASTOL BLUE**

Fuel additive performing the following functions:

- 1) It **emulsifies and disperses** condensate or infiltrated **water** that is formed in all fuel tanks.
- 2) It dissolves **fungus, tar and paraffin deposits of diesel fuel**, making it more uniform and clean.
- 3) Its neutral formula, diluted with petrol by-products, makes **Fastol a hydrocarbon** perfectly compatible with fuel so much so that the fuel excise regime is applicable to this product. Fastol **can be used in elevated quantities** without over-dosage to cause any side effect in case of decontamination and cleaning of very polluted or dirty tanks.
- 4) It **reduces consumption by over 5%**, because having a high surfactant power, Fastol allows a very fine atomization of the fuel that mixes better with air (O2) and is then totally combusted.
- 5) It eliminates black fumes due to its improved combustion.

For dosage, refer to the indications on the package and to the tech specs. Apply to the manufacturer's after-sale service in case of very damaged hulls.

It is **recommended for the winter storage** because it avoids the condensation and deposits formation in the tanks and piping so the boat will be ready to be et in motion after the winter rest.

Code	Description	Package
65.050.01	Fastol Blue diesel TRZ	100 ml
65.051.01	Fastol Blue petrol	100 ml
65.050.02	Fastol Blue diesel TRZ	1 l
65.051.02	Fastol Blue petrol	1 l

ECO BACT fuel biocide

Bacterial diesel fuel pollution is a very complex problem and increasingly more widespread. With respect to standard substances (paraffin, carbonaceous residues, asphaltene and tar) that are eliminated with Fastol, **bacterial sludge** is soluble only in acids.

Very little water is enough to develop bacteria. Bacterial sludge (biomass) clogs filters with a thick brownish black sludge and their growth triggers off corrosion on tanks.

Eco-Bact is a highly efficient biocide, soluble in both water and diesel, that concentrates in the aqueous phase of the diesel fuel where contamination occurs.

Eco-Bact **decontaminates** polluted fuel and can be used **periodically** to prevent contamination.

Code	Package	Treatment	
		continuous	periodical
65.049.01	1 kg	250 grams per 1000 litres every refuelling	1000 grams every 1000 litres in consideration of tank volume
